

SECURE CODING

CSE-2010

LAB ASSIGNMENT – 11

Name : Ch.Karthikeya Varma

Reg.No : 19BCD7138

Slot : L23+L24

Lab experiment – Creating secure and safe executable

Download and install visual studio (recent edition)

Write a C++ code of your own to build an executable and run the same.

Download process explorer and verify the DEP & ASLR status

Enable software DEP, ASLR and SEH in the visual studio and rebuild the same executable

Again, verify the DEP & ASLR status in the process explorer

Report the same with separate screenshot - before and after enabling DEP & ASLR.

Happy Learning!!!

The Application LOGINFORM.exe

The screenshot shows a Java Swing window titled "Login Form". The window has a standard title bar with a red close button, a yellow maximize button, and a green minimize button. The main content area is light gray and contains two labels, "Username :" and "Password :", both in bold black font. To the right of each label is a white text input field with a thin blue border. Below these fields is a gray rectangular button with the text "Login" in bold black font.

The DEP and ASLR status in program explorer when Data Execution Prevention (DEP) and Randomized Base Address (ASLR) has been disabled in Visual Studio for the application LOGINFORM.exe
